

# NEUROFEEDBACK TRAINING OPPORTUNITY

## A 2-Day Neurofeedback 101 Course with Trainer Michael Cohen

### What is Neurofeedback?

Neurofeedback is a non-invasive, medication-free treatment that encourages the brain to develop healthier patterns of activity.

### How does it work?

Neurofeedback takes advantage of the brain's ability to change itself. This ability is known as "neuroplasticity." It's the way learning takes place.

### Goal of the Course

To help parents and therapists get started in using neurofeedback for attachment disorder - with the support of experienced clinicians.

## Interested in this training?

Join us for a FREE 1-hour Intro to Neurofeedback Webinar to learn more about the treatment. This is a great opportunity for clinicians who might want to bring neurofeedback to their practice and people interested in home use for their families.

After attending the webinar, the 2-Day Neurofeedback course will be available to those who are interested!

If have any additional questions, please contact Pat O'Brien at [pat@affcn.org](mailto:pat@affcn.org)!

**SPOTS ARE LIMITED**

## SAVE THE DATES

FREE 1 hr. Intro Webinar:  
Friday, July 14th at 12 PM
